Hardy New England Grown
Nursery Stock

SEASON 1929

Houston's Nurseries
Mansfield, Conn.

HOUSTON'S NURSERIES. MANSFIELD. CONNECTICUT

WE wish to thank those who have so liberally patronized us and we are especially thankful to those who have recommended our stock to their friends. In such cases especially, we feel in honor bound to do our utmost to sustain the recommendations so many of our customers have given us. To fully satisfy each customer, that his interests are carefully considered when he intrusts orders to us, is our earnest ambition.

This catalog is our "silent salesman" who collects no commission; the agent's profit is thus eliminated and you profit thereby.

Our terms are cash with order or C. O. D., shipped either by express or parcel post. PLEASE add to your remittance the few cents necessary to cover parcel post, which will insure safe and sure delivery.

Parcel Post Shipments.—For small packages we recommend Parcel Post as it is the safest, quickest and most economical method of shipment. If you reside on a rural route, the package will be delivered to your door. The size of packages is limited to 84 inches combined length and circumference. The weight is limited to 70 pounds to points within first, second or third zones or within 300 miles. To points further away, the limit is 50 pounds.

**During February we are offering 10 percent discount;
during March, 5 percent on all orders accompanied by cash.**

Ordering early insures customer of receiving the things he wants. It enables us to plan on shipping before the Spring rush season commences. Stock ordered early is reserved until proper time for shipment.

OUR GUARANTEE

We guarantee all stock to be strictly first class and true to name and will, upon proper proof, refund the purchase price or replace any stock which proves otherwise. It is understood and agreed that we will not be held responsible for any greater sum than the cost of the stock, should any prove untrue. We strive to avoid mistakes and believe we are as exact as any in the business.

Any complaints regarding growth of stock must reach us on or before September 1st.

All questions will be answered cheerfully—so write us at any time.

We are always glad to see you and wish it might be possible for each one of you to come here for your trees and so prevent the damages sometimes received in transit.

If you have no use for this catalog, please pass it to a neighbor.

SUMMER VARIETIES

EARLY HARVEST — Medium to large; yellow; beautiful; fine flavor. Tree moderate, erect grower, good bearer; excellent variety for both orchard and garden. Ripens in August.

YELLOW TRANSPARENT — Earliest of all. Color when ripe pale yellow; good quality, mild yet sprightly flavor. Bears abundantly at a very early age.

RED ASTRACHAN — Large and handsome, crimson, rather acid. A good grower and very hardy. Aug.

GOLDEN SWEET — Large, pale yellow, tree a good grower and very productive. Aug. to Sept.

CRAB APPLES

TRANSPARENT — Large and good bearer; skin golden yellow, striped with red.

HYSLOP — Large, roundish-ovate, dark red with blue bloom; flesh yellowish.

A large part of our advertising is done by exhibiting our nursery stock at Fairs in Eastern Connecticut, Central Massachusetts and Southern Vermont. We have come in personal contact with thousands of people and made many friends. We should be pleased to number you among them.

HOUSTON'S NURSERIES. MANSFIELD, CONNECTICUT

Left Row Fertilized—Right Row Unfertilized

AUTUMN VARIETIES

DUCHESS OF OLDENBURG—Summer. Medium size; red-striped; flesh white, juicy and excellent flavored. Trees are natural dwarf growers and make fine fillers; require small root and branch space. Crops nearly always large.

GRAVENSTEIN — A very large, striped, roundish apple of the finest quality. Tree erect in growth and very productive. One of the finest fall apples. September to October.

WEALTHY—This beautiful moderate sized brilliant red apple is of fine quality, one of the best of its season; it is a relatively good keeper, and owing to the hardiness of the tree, its adaptability to cold climates, and

early bearing habits, it can be profitably planted as a filler. Season October to January.

FALL PIPPIN—Very large; yellow, tender, juicy and rich. Tree a vigorous free grower and fine bearer. An excellent baking apple. Ripens in October.

OPALESCENT—Color light, shading to very dark crimson with many yellow dots. It is not only a beauty, but is right as to size and productiveness.

MAIDEN'S BLUSH—Smooth, round, beautifully flushed with red on creamy yellow background; flesh tender, of pleasant but not high flavor.

WINTER VARIETIES

BALDWIN — Leading commercial variety in the orchards of New York, Pennsylvania and Ohio. The standard fruit in the American markets and very largely used in cold storage for export trade. Large, red and of good quality. Fruit keeps in common storage until April.

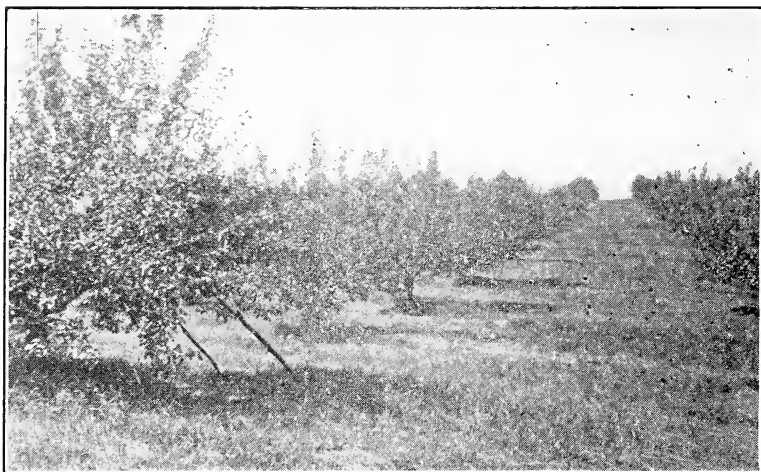

DELICIOUS—No new variety has ever so quickly gained popularity in so many different apple sections of our country. Fruit large, nearly covered with brilliant dark red, flesh fine grained, crisp and melting, juicy with a delightful aroma, of very highest quality. A splendid keeper and shipper. Tree one of the hardiest. November to April.

JONATHAN — Medium size; brilliant red, highly and deliciously flavored. Hardy, productive, healthy and vigorous; bears young.

CORTLAND—THE Cortland is a beautiful red apple, larger than the McIntosh, of better quality and matures a month later. Keeps late in Winter and can be handled and shipped like the hardiest of other market varieties. Has the caliber of real leader.

ROXBURY Russet — Medium to large. Surface rough, greenish covered with russet. Tree free grower, spreading; a great bearer. Keeps until June. Its great popularity is its productiveness and long keeping. December to May.

HOUSTON'S NURSERIES, MANSFIELD, CONNECTICUT

An Eight Year Old Apple Orchard

APPLES—WINTER VARIETIES—(Continued)

WAGENER—(Red Winter Apple) Wagener is one of the most beautiful winter apples ever grown. It is of the highest quality, the flesh being crisp, tender and aromatic. We know of no apple possessing greater beauty or of finer quality than the Wagener. It succeeds well East and West. December to May.

NORTHERN SPY—One of the most popular eating apples. Fruit large and attractive, striped bright red, juicy, crisp, tender and deliciously flavored. Ranks about third in commercial importance.

McINTOSH RED — An exceedingly valuable, hardy, attractive apple; good size; nearly covered with red. Flesh white, fine, very tender, juicy and refreshing. Tree hardy, vigorous, a good annual bearer—comes into fruiting early, yielding large crops.

ROME BEAUTY — Keeps in good condition until May or June. Large round, mottled and striped in different shades of red; flavor and quality way above the average; appearance and size are its valuable points; always sells and always brings good prices.

GRIMES GOLDEN—Beautiful, rich, golden-yellow Apple; flesh tender and juicy.

TOLMAN SWEET — Yellow with faint flushed cheek; valuable sweet winter baking apple.

WINTER BANANA—An excellent variety, which has stood the severest tests. Tree is hardy and will succeed in very cold climates; its wonderful productiveness will bring quicker and larger returns than any other Apple in the orchard. The fruit has a richness of flavor that cannot be described. Flesh golden yellow, fine grained.

FAMEUSE (SNOW APPLE)—One of the finest dessert fruits. Tender and delicious.

RHODE ISLAND GREENING—Is regarded as the very best cooking apple grown and also excellent for dessert use. Size large. Flesh yellowish, firm, fine grained, crisp, tender, juicy, slightly sub-acid, very good. Skin grass-green to yellow, sometimes with brownish-red blush. Tree large, strong, vigorous, wide spreading. Ripens in December, keeps until April.

HOUSTON'S NURSERIES, MANSFIELD, CONNECTICUT

Model Peach Orchard

PEACH TREES

Peach growing is a great industry. The ease with which these trees can be grown, their freedom from disease, the short period before they become productive, and the immense demand for the fruit, make peach growing very profitable. Invaluable also for the home garden. Our trees are all budded from bearing orchards, are free from disease and have extra fine roots.

GREENSBORO — A hardy white peach of good size, ripening the last of July; the skin is a greenish white, one side is covered with crimson, of fair quality and considered a good market variety with which to start the season.

OLD MIXON—This is one of the standard Persian sorts of high quality that has been displaced among the commercial growers by the Belle, with which it ripens, but every home orchard should contain this variety on account of its quality; white freestone.

Elberta Peaches

PEACH TREES—(Continued)

EARLY ELBERTA — Freestone, mid-season, of Elberta type. Large, golden-yellow flesh, far better in quality than the Elberta, sweeter and finer grained. Tree strong grower, has tendency to thin itself like Elberta, carrying moderate loads of fruit.

ELBERTA — One of the greatest peaches grown. Freestone. A beautiful extra large, golden yellow peach with brilliant red cheek, firm, juicy, highly flavored, rich and sweet. It is the standard of market sorts.

CARMAN—This is a hardy and reliable bearer of medium to large white fruit having beautiful red cheek where exposed to the sun. This is a standard commercial variety and should be included in every complete list.

HILEY—This is one of the most beautiful peaches on the list and the earliest perfect freestone; a white fleshed peach of fair quality skin, creamy white nearly covered with red.

ROCHESTER—A large yellow freestone peach of good quality, ripening at a time when yellow peaches are scarce. The earliest good yellow freestone peach.

MOUNTAIN ROSE—This is one of the old varieties that still retains its place on the list. Of Persian type, it possesses the high quality of that

race. The fruit is large and round, flesh white and frees readily from the pit, skin whitish, nearly covered with dark red, should be included in every home orchard or wherever quality is of consideration.

BELLE OF GEORGIA — A very large, white fleshed peach with a red cheek; firm, juicy and of excellent flavor. Productive. A fine shipper and does well in the North as well as in the South. Rapid grower.

CHAMPION—An exceptionally high quality, hardy white peach. Freestone. Large size, white fleshed, excellent quality. It is known as one of the best shippers. Tree is almost perfect. Fine peach for home use as well as for the local markets. Very hardy fruit bud, often bearing a full crop when other varieties fail.

CRAWFORDS EARLY—This magnificent large yellow freestone peach is good quality, and a beauty which makes it one of the most popular orchard varieties.

J. H. HALE — Color deep golden yellow overlaid with bright carmine. Skin is thick, smooth and little fuzz. Flesh is deep yellow, fine grained, firm, tender and of a very delicious flavor. Flesh is firm and heavy and will ship and keep well.

PLUM TREES

Plums have a distinctive flavor from any other fruit and are especially fine for eating fresh, for jellies, preserves and unexcelled for canning for desserts. Plum trees require no more care than the pear or peach and thrive well under ordinary conditions, however they do best in a cool, not too dry a place and in good rich soil.

5% Discount on All Cash Orders during March

ABUNDANCE—One of the oldest and best Japanese varieties. Hardy, productive. Fruit large, lemon yellow with heavy bloom, good quality. Aug.

BRADSHAW—A very large and fine early plum, dark violet red, juicy and good. Very productive; valuable for market. The tree is very hardy and vigorous. Middle of August.

GERMAN PRUNE—Medium; oval; purple or blue; juicy, rich, fine. Tree vigorous and very productive. One of the best. Sells for higher prices in market on account of high quality. A leading favorite. There is no easier grown fruit that gives greater or more certain profit than the German Prune. Owing to its keeping qualities it is highly prized for shipping. Sept.

BURBANK—Most profitable among the growers for market. Ripens about ten days after Abundance. Tree hardy, spreading, vigorous grower. Unequaled in productiveness. Bears young. Fruit large excellent quality. Cherry red with lilac bloom.

SHROPSHIRE DAMSON—Medium, dark purple. Very productive. Best for preserving. October.

BEAUTY OF NAPLES—A variety of the highest promise; large; color of greenish-yellow; flesh firm and juicy, very fine flavored. Tree very hardy and prolific. Middle of September.

PEARS

First-class Pears are always in good market demand, and they are today one of the most promising fruits to plant for profit. Every garden should have a few pear trees.

BARTLETT—This is the most popular summer pear, both for home use and market, which the world has ever known. It comes into bearing at an early age and bears enormous crops of large and handsome fruit, juicy, buttery and melting, with a rich, fine flavor; a delicious eating pear, and makes the finest of canned fruit. The Bartlett may be picked before it has attained its full size, and will ripen and color beautifully, and may be of good quality. However, it should always be picked before it is fully ripe.

CLAPPS' FAVORITE—Large, fine; pale lemon-yellow, with brown dots; fine texture, melting, buttery, juicy, with a rich, sweet, delicate vinous flavor. Tree hardy and very productive. Thrives where other varieties fail.

SHELDON—Medium size, greenish russet, melting and juicy, highly aromatic flavor. Should be planted early.

KIEFFER—Tree a remarkable grower, with so vigorous a constitution that it rarely, if ever, blights. Fruit of fine size, rich color and fair quality. Brings high prices in competition with other varieties, and is a great market pear. Best when picked at maturity and house-ripened. October and November.

SECKEL — Small, skin brownish green at first becoming dull yellowish brown with a lively russet red cheek; flesh whitish, buttery, very juicy and melting with a peculiarly rich, spicy flavor and aroma. This variety is pronounced by good judges the richest and most exquisitely flavored pear known. August and September.

BEURRE BOSCH—A large and beautiful russet pear, very distinct with a long neck; melting or nearly so, highly flavored and delicious, bears well. October.

HUGONIS

"GOLDEN ROSE OF CHINA"

Before other Roses are awake in Spring, Hugonis throws its slender sprays abroad, wreathed in softest yellow—and all of us who still believe in fairies know it came from fairyland. Each 75c

CHAMPION—Fruit very large, fair and handsome. Tree very handsome, surpassing other varieties in this respect, bears abundantly while young; flesh cooks as tender as an apple and without hard spots and cores; flavor delicate, imparting an exquisite quince taste and odor to any fruit with which it is cooked.

ORANGE—Popular, extensively cultivated, reliable and satisfactory. The name was given in an attempt to do justice to its most delicious flavor. Roundish, bright golden yellow. Best for cooking. Firm, will stand shipping.

BLACK TARTARIAN—Very large, bright, purplish black, half tender, very rich, excellent. Vigorous and productive. A general favorite.

WINDSOR — The standard of excellency. The hardiest of the sweet varieties. Large, very dark red, with firm, tender juicy flesh. Prolific bearer.

NAPOLEON BIGGAREAU — Very large, pale yellow or red, very firm, juicy and sweet, vigorous and very productive. One of the best.

YELLOW SPANISH—A most beautiful and popular light-colored cherry. Large; pale yellow, with red cheek when exposed to the sun; flesh firm juicy and delicious.

GOVERNOR WOOD — Very large, rich light yellow, with red cheeks, juicy, sweet, one of the best.

SOUR CHERRIES

MONTMORENCY—The most popular of all hardy cherries for market and home use. This cherry is planted largely. The fruit is in great demand. It is of large size, light red in color; stem rather short. Acid. The trees bear fruit soon after planting. Mid-season.

ENGLISH MORELLO—Medium to large, blackish-red, rich, acid, juicy, good, very productive. Late.

EARLY RICHMOND — This is a hardy cherry, fruiting on young trees soon after planting and bearing every year enormous loads of dark red fruit that does not rot upon the trees; can be left without picking longer than most varieties. Unsurpassed for canning and profitable for market. Early.

That we may increase our mailing list we are offering the following: To anyone who will send us the names of 10 people who might be interested in nursery stock or to anyone who includes with his order an order from a friend, we will add a rose bush to each order, your selection as to color.

GRAPES

CONCORD — Decidedly the most popular grape in America and deservedly so. Adapts itself to varying conditions and is grown with more or less profit in every grape-growing State in the Union. Bunch large shouldered, compact; berries large, covered with a rich bloom, skin tender, but sufficiently firm to carry well to distant markets; flesh juicy, sweet, pulpy, tender; vine a strong grower, very hardy, healthy and productive. For general cultivation the most reliable and profitable.

WORDEN—Possesses most of the good qualities of Concord and lacks some of the bad ones. Differs chiefly in having larger berries and bunches. Better in quality and five to ten days earlier.

DELAWARE—Red. Bunches small, compact, shouldered, berries rather small, round, skin thin, flesh very juicy, sweet, spicy and delicious.

MOORE'S EARLY BLACK—Bunch large, berry large, round with heavy bloom; vine exceedingly hardy. Its earliness makes it desirable for an early market.

NIAGARA WHITE — Occupies the same position among the white varieties as Concord among the black; the leading profitable market sort. Bunch and berries large, greenish white changing to yellow when fully ripe.

BRIGHTON — This is one of the leading red grapes for home use; fruit is of high quality but can be kept only a short time after picking; the vine is vigorous and productive; ripens in mid-season.

HOUSTON'S NURSERIES, MANSFIELD, CONNECTICUT

Cultivating Strawberries

HOWARD '17. (Perfect) Without any exception this is the greatest berry we have ever fruited. A strong grower and a heavy producer, it gives maximum yields of fine-quality fruit. The berries are conical, bright red all over, entire free from white tips so common on many varieties. It begins to ripen very early and continues well into mid-season. Reports from some growers as to yield seem unbelievable, but the fact remains that we can unqualifiedly recommend it as positively the best in strawberries either for home use or market. Because these facts have been proven true, we have, for the present, discarded other varieties that we might be better able to supply the enormous demand for the Howard.

RASPBERRIES

What is more delicious in summer than a dish of fragrant Raspberries brought direct to your table from your own garden? Use a few square feet of your yard to set out some plants this year. They are easy to grow and require little care. To produce the best fruit the old canes should be cut down as soon as they are through fruiting.

CUTHBERT—Large red berry; flesh firm and of rich flavor. We recommend it for either home use or field culture as it is one of the leaders on all markets.

LATHAM—The new, big red raspberry outclasses all others in yield, profit, vigor, hardiness. This variety originated at the Minnesota Fruit Breeding Farm and is being extensively planted all over Minnesota, the Dakotas, Canada; in fact all over the

country, appearing to do equally well everywhere.

PERFECTION — Red. A new raspberry from New York. It is a very strong grower and has stood twenty degrees below zero without injuring the buds. Berries bright crimson, mammoth and uniform in size, and grow in clusters. Immensely productive and continues to bear through a long season.

Raspberries—Wire System

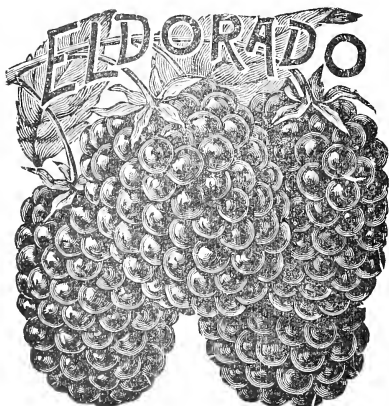

RASPBERRIES—(Continued)

PLUM FARMER—Black. Has been thoroughly tested in Western New York, where it is a great favorite for market and home use. Fruit very large, often an inch in diameter. Brings highest market price.

COLUMBIAN — Purple berry; of rich sprightly flavor. It is undoubted-

ly the best raspberry in cultivation for canning, as it retains its color, form and flavor. Most productive of all raspberries.

HERBERT—This variety is probably the heaviest yielder of any of the Red Raspberries. The berries are large and good color.

BLACKBERRIES

Dozen	Hundred	Thousand
\$.75	\$4.00	\$35.00

ELDORADO — One of the leading and most profitable varieties. Extremely hardy and a very strong grower. Good canner.

SNYDER — Medium size, sweet, melting, juicy, with no hard core.

Norway Spruce

Spruce, Norway

A lofty, elegant tree of perfect pyramidal habit, remarkably elegant, and rich; as it gets age has fine graceful, pendulous branches; is exceedingly picturesque and beautiful; very popular, and deservedly so, and should be planted largely. One of the best evergreens for hedge if trimmed properly each year.
